Not logical function in excel

In this article, we will discuss Not logical function in excel.

Purpose

Returns the reverse logical value of its argument. Consider the following statement

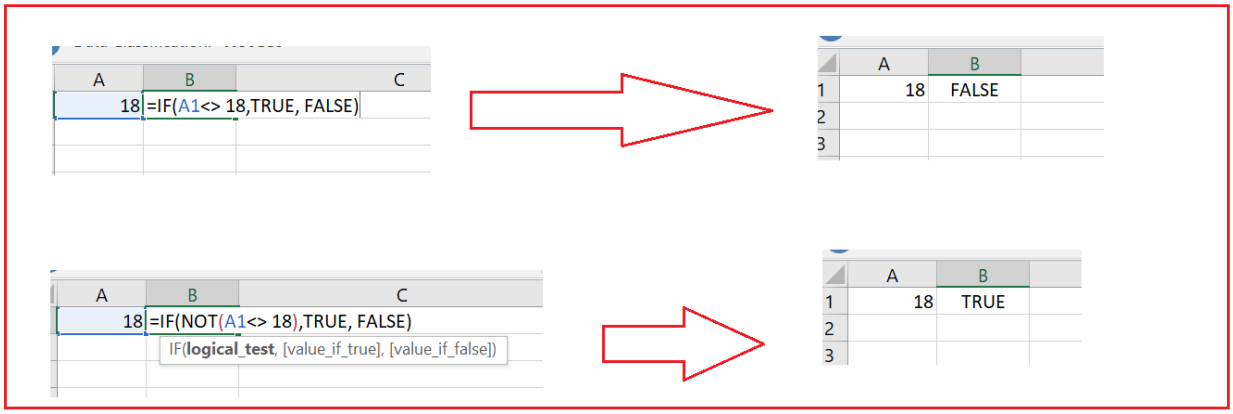
```
If ( A1 <> 18 )
```

If the value of cell A1 is 18 then the above statement will return false else true. If we use NOT function, then return value is opposite.

Syntax

```
NOT ( logical )
```

Example



Consider an example where we want to check if a person is eligible for the vote or not.
